Job Description: Senior Software Developer cum Project Manager

Job Summary:

The Senior Software Developer cum Project Manager will play a crucial role in the development and management of an eCommerce portal. This position requires a blend of technical expertise and project management skills to ensure the successful delivery of high-quality software solutions. The candidate should be well-versed in Magento and Laravel development, cloud-native architectures, containerized deployments, and have strong leadership skills to oversee the entire software development life cycle.

Educational Qualification:

- Bachelor's or Master's degree in Computer Science, IT, or related field.

Experience:

- Minimum 10+ years (post-qualification) in software development, with substantial exposure to eCommerce business processes (order management, inventory, payments, customer experience).
- Proven expertise in building secure, scalable, and cloud-compatible applications that handle high volumes of users.
- Experience leading teams, managing code repositories with Git, handling software release/versioning cycles, and implementing CI/CD pipelines.
- Experience with containerization (Docker) and orchestration (Kubernetes) for scalable deployments.
- Experience with monitoring and observability tools (e.g., Prometheus, Grafana, AWS CloudWatch, ELK Stack).
- Experience in using AI tools for software development and unit testing.

Roles & Responsibilities:

- Lead design, development, customization, and maintenance of the Magento-based eCommerce portal.
- Develop, test, and maintain web applications using Laravel framework.
- Architect and implement modular, microservice-driven solutions for scalability and maintainability.
- Define project scope, objectives, and deliverables in alignment with stakeholders.
- Develop and track detailed project plans, ensuring timely delivery within scope and budget.
- Provide technical guidance, mentorship, and leadership to the development team.
- Conduct code reviews and enforce best coding practices and standards.
- Collaborate with front-end developers to integrate user-facing features with backend systems.
- Ensure performance optimization, scalability, and security of the platform.

- Plan and execute Magento upgrades, security patches, and integrations with third-party systems.
- Manage software release planning, version control, CI/CD pipeline-driven deployments, and containerized environments.
- Implement monitoring, logging, and observability solutions to ensure system health and uptime.
- Maintain detailed technical documentation, project reports, and stakeholder updates.
- Resolve complex architectural and performance challenges with innovative solutions.

Technical Skills:

- Strong expertise in Magento development (custom modules, themes, extensions).
- Proficiency in Laravel framework for modern web application development.
- Proficiency in PHP, MySQL, HTML5, CSS3, JavaScript, MVC design patterns.
- Hands-on experience with APIs, web services, and third-party integrations.
- Proven knowledge in modular architecture and microservices.
- Experience designing and managing secure, scalable, cloud-native applications.
- Expertise in handling high-volume traffic with CDN, caching, and distributed systems.
- Practical experience with: CDN, AWS S3, Redis, Redshift, ELK Stack, DynamoDB, MySQL, RDS, RabbitMQ (RMQ).
- Strong expertise in Git, version control, software release management, and CI/CD pipelines (e.g., Jenkins, GitHub Actions, GitLab CI/CD).
- Experience with containerization (Docker) and orchestration (Kubernetes) for scalable, cloud-based deployments.
- Experience with monitoring & observability tools (Prometheus, Grafana, AWS CloudWatch, ELK).
- Familiarity with front-end frameworks (React, Angular, Vue.js) – preferred.
- Strong understanding of security, accessibility, and compliance standards.
- Experience in database schema design and optimization for eCommerce workflows.
- Proven track record of leading Agile/Scrum teams and delivering high-quality projects.
- Experience with unit testing and TDD using PHPUnit.
- Experience with AI tools for software development, debugging, and automated testing.

General Conditions applicable to all applicants covered under this advertisement:

1. Those candidates, who are already in regular or contractual employment under Central / State Government, Public Sector Undertakings or Autonomous Bodies, are expected to apply through proper channel or attach a 'No Objection Certificate' from the employer concerned with the application OR produce No Objection Certificate at the time of interview.
2. Digital India Corporation reserves the right to fill all or some or none of the positions advertised without assigning any reason as it deems fit.
3. The positions are purely temporary in nature for the project of Digital India Corporation and the appointees shall not derive any right or claim for permanent appointment at Digital India Corporation or on any vacancies existing or that shall be advertised for recruitment by Digital India Corporation in future.
